

NEW Mercury Quick Attack LE - Portable Monitor

STYLE 3444

Hit Low, Hit Hard and Hit Far with the NEW Mercury™ Quick LE - Portable Monitor.

The Mercury Quick Attack LE sets a new standard in the market and is the only portable monitor that meets NFPA 1964 and EN-15767-1. It is compact and lightweight at 15 pounds and flows 500 GPM. Now even better, it can hit low at 10° and far up to 250 feet at 100 psi. Easy and quick to deploy, friction loss is minimal.

Features

Mercury Quick Attack LE Features

- Hits low at 10°
- Improved reach up to 250 feet at 100 psi when paired with the new Mercury nozzle (Style 4446)
- Compact size & weighing only 15 lbs for quick deployment
- Meets NFPA 1964 and EN-15767-1
- Easy open/close valve
- Strap attached with bag for easy stowing
- Knurled handle for improved grip
- Handle wiper to minimize debris collection
- Elevation range of +10° to +50°
- Rotation +- 20°
- Rated flows up To 500 gpm (1900 lpm)
- Low 6 psi friction loss at 500 gpm
- Maximum operating pressure of 230 psi. Exceeds the standard of 200 psi

Design your own combination by choosing from these product options:

- Storage Bracket
- Stacked Tips Style 2420
- Deluge Tip Style 489
- SaberMaster Nozzle 1545
- Mercury Nozzles Style 4445, 4446

Applications/Solutions

Type	Portable
Material	Pyrolite
Brand	Mercury
Width	23.2" (584.3 mm)
Height	9.6" (243.9 mm)
Depth	15.0" (381.0 mm)
Inlet	2 1/2"
Outlet	2 1/2"
Operating Pressure	230 (16)
Flow (GPM)	500

Mercury Quick Attack LE - Portable Monitor

STYLE 3444

Mercury Quick Attack LE - Portable Monitor

STYLE 3444

Mercury Quick Attack™ LE Monitor Style 3444 Specifications

The 500 gpm portable monitor shall meet NFPA 1964, 2018 and EN-15767-1. The quick attack monitor shall be lightweight and compact in size. It shall have a 2 1/2" inlet with a full time swivel and a 2 1/2" outlet. The monitor should weigh no more than 15 pounds or 6.8 kg less the nozzle, and have dimensional layout of 9.6"H x 15.0"L x 23.5W (deployed). The monitor shall have a maximum operating pressure of 230 psi or 16 bar. The legs shall fold away to reduce the width down to 7.75". The monitor shall have + 10° of rotation and 50° to 30° elevation range for unmanned use. The handle shall consist of a spring-loaded mechanism that lets the user travel down to 10° of elevation for manned use. The legs shall have a T design and have carbide tip spikes. The monitor shall have a safety strap with integrated bag and hook that is mounted to the monitor and can be hooked to itself to be used as a carrying strap. The monitor mounting bracket shall have the ability hold the monitor with an Akron Brass adjustable/selectable nozzle, Akron Brass fixed orifice nozzle, Akron Brass oscillating nozzle or Akron Brass smooth bore deluge tip. The monitor shall have an unobstructed waterway with a friction loss no more than 6psi at full flow. It shall have a ball shut-off valve with the Akron Tork-Lok mechanism. The material shall be of Pyrolite® construction with the Akro-Tec coating and chrome trim. The outlet shall have a reflective band for night visibility.
