

**YOUR PARTNER
EVERY STEP OF
THE WAY**

HAAGEN's Custom Build Division provides fire and safety training systems that are designed to address the specific training requirements of each customer. Every training system is a unique project developed in line with your learning objectives. You have the concept and we have the solution. HAAGEN training systems include portable fire props, tow behind and semi-trailer based props, ISO container based props, training buildings and even large scale training complexes.

HAAGEN has the experience to help you take your project from concept to reality. With over 25 years of technical and real-world firefighting experience, we can ensure you achieve your objectives with intense and highly realistic scenarios designed for effective and efficient training.

HAAGEN is ISO-9001 certified and meets the most rigorous local, national and international safety and quality standards.

WORLD CLASS TRAINING CENTRES

>Portable/outdoor props

>Petro-chemical installations

>Training buildings

FIND OUT WHY WE ARE WORLD LEADERS

HAAGEN has extensive experience in the development of full-scale fixed training facilities including fire training towers, training ships, aircraft simulators, industrial complexes and multi-structure training sites. In fact, HAAGEN has become the world leader in the design and development of multi-disciplinary fire training campuses and can work with you every step of the way from concept to planning to construction.

OUR PROJECT-BASED APPROACH

HAAGEN's project-based approach follows a fixed process divided into several phases. This ensures the quality of the end result while at the same time providing enough flexibility to allow for the implementation of changes, even during the course of the project, thus improving the final result.

TRAINING CENTRES COMPLETED WORLDWIDE

HAAGEN designs, develops and builds fire training systems around the world. The following references are just a few examples of HAAGEN custom designed fire training systems in use around the world.
